CIFMERS GLOBAL aims to promote and maximize Facility Management discipline with the highest integrity and professionalism. It has several types of actions to achieve this: first to mention is CIFMers, the annual FM International Congress with 3 locations: Latam, Asia and Africa, moving to one country to another within each region each year; Then the CIFMers Conferences, itinerant one-day encounters held in varied locations and finally LSDFM, La Semana del Facility Management, otherwise known as The Week of FM, with the objective of launching local FM associations in the countries that don't have one. These events have hosted in the past years more than 6.200 assistants, 98% of which have declared to be satisfied or very satisfied with the experience. This figure is the proof of the quality, transparency and attention to detail offered by the organization. CIFMERS GLOBAL has become the biggest content generation and diffusion channel for FM worldwide, broadcasting most events and uploading everything, offering more than 400 full speeches on its web for free.
